

Chemical Batch Codes

Kodak processing chemicals in glass and plastic bottles display a batch code. Most often, the batch code appears on the bottle above the label, but may appear below the label or be printed on it as space permits.

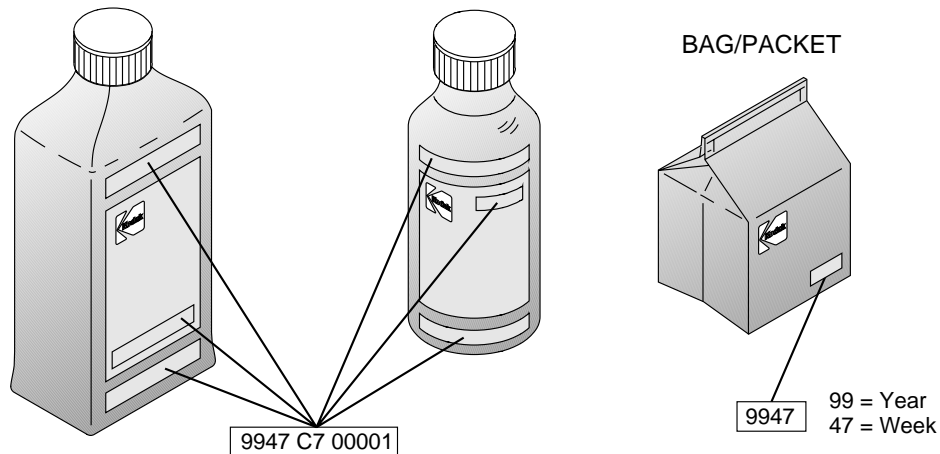

The batch codes will contain an additional letter that identifies the bottling or filling line. Codes on cases, drums, and flexible containers (cubes) remain unchanged.

Identification Codes for KODAK Packaged Chemicals Sourced in the U.S.

PLASTIC BOTTLE

GLASS BOTTLE

BAG/PACKET

- 99 = Year of manufacture
- 47 = Week of manufacture
